

Request for Letter of Recommendation for Masters Application in MSc Interaction Technology from University of Twente

Dear Mr. Yoyok Yusman Gamaliel, M. Eng.,

I hope this letter finds you well.

I am **Ezra Ravin Mateus**, your former student & alumnus from the **Media & Internet Technology department at Institut Teknologi Harapan Bangsa**. I was in the final project class where you supervised my final-year thesis on Automatic License Plate Recognition using OpenCV.

I am writing to you today with an exciting update and a humble request. I am applying for the **MSc in Interaction Technology at the University of Twente in the Netherlands**. This program is the perfect academic extension of the work I started under your guidance, focusing on building the bridge between user-centric design and robust engineering.

It would be an immense honor to have you as one of my referees for the university application, the university scholarship and the QS Impact Scholarship. Your guidance during my thesis was invaluable, especially in cultivating a rigorous approach to problem-solving. The experience of developing Linux OS scripts to overcome limitations during my thesis was a pivotal learning moment, and I believe your perspective on my technical abilities and systematic approach would carry significant weight with the admissions committee.

To make the process as convenient as possible for you, I have prepared a package of materials that includes:

1. [My Current Curriculum Vitae \(CV\)](#)
2. [My Statement of Purpose/Motivation Letter](#)
3. [My Academic Transcript](#)
4. [A brief guideline for the program](#)
5. [A draft template for the letter, which you are free to use, edit, or ignore as you see fit.](#)
6. [Guide for drafting the recommendation letter.](#)

The application deadline is **31 December 2025**. Would it be possible for you to confirm if you are willing and have the time to support my application?

Thank you so much for your time, and for the impactful knowledge and mentorship you provided me during my studies at ITHB.

Note: Only one recommendation letter is needed for all applications for scholarship.

Should you lose access to this letter,
please visit rodeon33.com/request/yoyok thank you.

I look forward to hearing from you.

Warm regards,

Ezra Ravin Mateus
